Garden management

Beautiful gardens are an extension of who you are. They are also the result of a partnership, a synergy of your aspirations with our expertise.

Our clients seek out our services for the consideration we give to the brief, taking the time to design a personal result that is yours and yours only.

We nurture our client relationships the same way we nurture their gardens – with time and respect. When you create with Branché, we like to think we will be with you for the long-term, ensuring your landscape meets our high expectations and continues to deliver your unique aspirations.

Starting with a detailed conversation, our combination of creativity balanced with engineering finesse ensures that your garden design evolves into a timeless sanctuary.

Our team makes sure the development of your garden is seamless. You can trust us to take care of the detail, with clear communication and a guarantee to turn up on time, every time.

The result is a landscape in harmony with your lifestyle, reflecting your personality and delivered with sophisticated flair.

connections**

‘They
got us’

Dairy Flat

John Milner

“Branché Landscapes took our dream and made it a reality. They created a garden sanctuary with wonderful French flair and captivating water features, complemented by fully remote controlled lighting and irrigation.

“Right from the beginning, it was clear we were doing more than simply buying a new garden. Arnaud and his team ‘got us’, and we knew our property was in safe hands.”

Castor Bay

Pat and Marg Houlihan

“When we planned to renovate our home recently, we knew what we wanted indoors, but updating the garden was a new concept for us. The Branché team provided us with the foresight and planning needed to totally transform our neglected outdoor area, and the result is a marvellous upgrade to our home.

“As a bonus, not only were Branché reliable and hardworking, they were a pleasure to have around our home.”

Sandringham

Sarah and William Tietjens

“From the outset Arnaud was on time, efficient, clear in his explanations and vision and always had time to listen to our thoughts on the garden progress and any changes we wished to initiate. Branché Landscapes have totally transformed our back garden from a weed-ridden unusable space, into a beautiful functioning masterpiece.”

Kingsland

Nigel Pengelly

“I cannot recommend the Branché team highly enough. I loved the ideas that Arnaud came up with and his team were highly professional, polite, and engaging with my children while on site.

“The irrigation and lighting were an area I had not given much thought to, and they have provided the perfect finishing touch.”

**International
designs for
local gardens**

Dairy Flat — Lifestyle property
John Milner

When the brief was to design a garden complementing the majesty of this country mansion, we responded with a nod to Versailles and the structure of a French garden. A series of arches provide balance and symmetry, while inviting pathways and dramatic evening lighting connect the outdoor spaces.

Parnell — City garden
Clive and Janice Taylor

A manicured garden in the central city lends sought after privacy in the suburb of Parnell. Tasked with updating an outdated, overgrown garden and 'letting the house breathe', our design delivers vista and an open feel while providing the seclusion of a garden sanctuary.

Castor Bay — Resort-feel entrance
Pat and Marg Houlihan

A grand, welcoming entrance and a generous deck provide a warm and inviting appearance to this resort-feel property. From its dated original design, we worked with the owners to transform their outdoor spaces using a smart range of lighting, feature pots and modern, crisp planting.

Kingsland — Natural garden

This busy family were seeking a natural garden to provide seasonal interest and substance while being secretive and playful. Our solution provides a selection of dwarf fruit trees and a natural lush planting design that plays with the elements, highlighted by subtle and effective lighting.
